

DECORATIVE: LACQUER SPRAY

MATERIAL

ONLY FOR

HARDNESS

CAR-REP CLEAR COAT EFFECT SPRAY: Specially formulated clear coat for Car-Rep Gold, Chrome and Copper effect paints. Improves the scratch, weather and wear resistance of the effect paints. Formulates a thin, clear layer which makes the effect color outdoor proof.

Attention: The previous paint layer must be dry before the application. The lacquer looks first milky white but becomes transparent while drying.

Instructions: shake the bottle for about 3 minutes and also occasionally during painting. When painting, keep the bottle in its upright position, at the distance of about 25 cm from the surface. To clean the nozzle, turn the bottle upside down and spray until only gas comes out from the bottle. We recommended to wear protective clothing and goggles when painting.

BINDER:

Alkyd, Water based
