

CANDY PAINT

MULTI-LAYER SYSTEM OF TRANSPARENT AND LUMINOUS COLORS

Candy paints are tints obtained with Candy inks. It is a painting system that is composed of a reflective undercoat and a colored transparent layer.

Candy® is a French brand of StardustColors.

CANDY STARDUST PAINTS

STARDUSTCOLORS, MANUFACTURER OF CANDY SHADES SINCE 2009

Stardust manufactures about twenty transparent inks for solvent or hydro-based paint systems for **the automotive and decoration sectors**. Candy concentrated inks are the basis of the Candy painting technique. They are miscible in varnishes and binders and create **totally transparent and deep tints**.

The candy color is the visual result of a **multi-layer system**, which reflects and colors the light and thus creates a **transparent, iridescent and luminous color**. This technique is realized with a Candy undercoat and a Candy tinted varnish. By **combining the different Candy layers**, with the different Candy varnishes, a large number of color combinations can be obtained.
